DDCI briefed at length on the meeting between Clifford, Coyne, DCI, and DDCI yesterday. Chief, FE was in attendance. Highlights included the fact that Clifford and Coyne were impressed by the high level of CIA field representation. The travelers made a point of relaying Presidential concerns and desires for more intelligence on the Viet Cong, NVN, and Communist China. Clifford and Coyne felt that counterintelligence efforts in all areas they visited were inadequate. Agency relationships with U. S. Embassies appeared good.

In South Vietnam they were impressed by the PAT operations which they considered illustrative of political operations as the wave of the future. They noted that such operations, when matched against military requirements, will lead to severe competition for Vietnamese manpower. They thought additional emphasis needs to be placed on NVN and VC defector inducements.

to, or otherwise deal with, Communist China; and that the U. S. Government might do more to press [redacted] for more efforts in this field.
